

Embracing Technology at Gentec Manufacturing

A modern approach to Quoting and Estimating using **Paperless Parts**

At Gentec, our mission remains to provide our customers with the highest quality service, excellent machined parts & assemblies while utilizing the latest technology and security. That's why we're excited to announce our recent implementation of Paperless Parts, a streamlined, secure, modern quoting and estimating platform to provide our customers with the best experience possible.

Paperless Parts enables us to analyze 3D CAD geometry and 2D files quickly to arrive at an estimate for setup times, run times, material size and price calculation, outside processes and hardware costs. The system also gives us the ability to securely collaborate with customers looking for feedback using Design for Manufacturing (DFM) principles and the resulting cost impact to their designs in real time.

Additionally, we recognize the importance of protecting our customers' intellectual property and the cybersecurity landscape that is constantly evolving. The Paperless Parts platform offers the power of a cloud-based solution combined with the highest level of cybersecurity in line with new CMMC regulations.

Utilizing Paperless Parts, Gentec Manufacturing can now provide our customers with:

- A simple method to submit RFQ's directly through our website www.gentecmfg.com/rfq. Emailed RFQ's to mark@gentecmfg.com are always welcome as well.
- Secure communication channels to enable collaboration about design revisions or feature changes.
- The ability to provide customers with consistent and accurate quotes in streamlined fashion.
- A digital quote experience that provides all the possible purchasing options (including expedite) for the RFQ project.
- The ability to easily check out and submit your Purchase Orders through a digital quote. Emailed or portal PO's are also welcome.

With Paperless Parts, we have enabled our team to respond to our customers' needs faster than ever before. From seamless collaboration and real-time feedback on manufacturability to consistent and accurate quotes delivered in record time, we are thrilled to offer our customers an unparalleled experience.

**Want to experience the power of Gentec Manufacturing & Paperless Parts firsthand?
We invite you to submit an RFQ today.**
